#### ABSTRACT

This document contains an introduction to the Ohio Integrated Technical and Academic Competency (ITAC) and Specialization ITAC; an overview of the nurse assistant occupation; a list acknowledging professionals who helped develop the competency list; and the comprehensive list of the professional or occupational competencies deemed essential for graduates to be able to perform proficiently when they graduate from an Ohio specialization workforce development program for nurse assistants. The introduction explains the following: (1) critical academic, employability, and information technology skills have been integrated throughout the list to support the technical skills; (2) the competency profile can be used as the basis for curriculum development in Ohio's secondary, adult, and postsecondary programs; and (3) the specialization competency profile is organized so that it can be clustered or grouped in a modular approach. The overview of the nurse assistant occupation describes general duties, some specific tasks, employment opportunities, length of program, type of program (classroom instruction and/or work experience), and types of certificates and/or degrees. Competencies are grouped under broader skills that are, in turn, categorized under these 14 major topics: nurse assistant orientation; physiology and anatomy; emergency care; infection control and resident/client safe practices; legal and ethical responsibilities; communication skills; basic personal care; vital signs; nurse-related procedures; death and dying; care of elderly resident/client; care of resident/client with special needs; restorative duties; and home health care. ## Introduction to the Specialization ITAC

Revised 2001

The Ohio Integrated Technical and Academic Competency (ITAC) profiles are developed under the auspices of the Ohio Department of Education and the Ohio State Board of Education. They provide a broad-based educational response to Ohio's need for a skilled workforce. Each Specialization ITAC represents a profile of the professional or occupational competencies deemed essential for a graduate to perform proficiently when he or she graduates from the specialization workforce development programs in Business and Marketing, Industrial and Engineering Systems, Health Occupations, or Family and Consumer Sciences. The Specialization ITAC profile, in conjunction with the competencies identified in the Foundation and Clusters ITACs, provide a career pathway that can lead to employment or further education.

#### **Process and Intent**

The integrated competency lists are the result of all encompassing research and review of existing competency profile lists and includes input from industry, labor, professional organizations, professional and industrial representation, and national standards for a specific industry/profession. Representatives from a broad cross-section of Ohio professional organizations, businesses/professions, industry, and labor played a critical role in identifying current and future knowledge and skills for the industry, and defining the vision and scope of the profession/industry. The instructional methods and teaching strategies are the responsibility of the local school system and/or instructor.

## **Curriculum Applications Using the ITAC Competency Profiles**

Each profile includes a comprehensive listing of occupational skill competencies that reflect the job opportunities and skills that are required to work in a specific profession/career pathway. Critical academic, employability and information technology skills have been integrated throughout the list to support the technical skills. These competency profiles will be used as the basis for curriculum development in Ohio's secondary, adult, and post-secondary programs. The specialization competency profiles are organized so that they can be clustered or grouped in a modular approach. Individual curriculum specialists can use the competencies profiles to develop instructional programs based on local needs as determined in conjunction with their local advisory committees. i.e., the specialization cluster academy approach. Final assessments will be designed to accompany each profile list and to accommodate student evaluation by modules.

## Overview

#### **Nurse Assistant**

The Nurse Assistant program is designed to prepare students to meet the demands necessary for multi-skilled nurse assistants who can assist in providing health-care to patients who may need long-term care or provide home health care for patients recovering from medical illnesses or to assist with daily living needs. A successful assistant needs to enjoy working with people and interacting with others.

Students receive classroom theory information and laboratory practice, along with experience in clinical settings where they can apply practice and acquire Nurse Assistant skills in real life situations. CPR training is provided in addition to training in basic first aid.

The instructional program incorporates various units in the curriculum including: basic physiology and anatomy, emergency care responsibilities, communication skills, basic personal care, vital signs, nurse-related procedures, care of elderly resident/clients, care of residents/clients with special needs, restorative duties and home health care.

Successful graduates are eligible to take Ohio's Examination to become a State-Tested Nurse Assistant. Employment may be found in a variety of settings; e.g., in a nursing care center, assisted-living center, hospital, physician's office, home health setting, or in other health-care positions. There are many job opportunities for nurse assistants as health-care needs in our society change.

Working as a Nurse Assistant is often a stepping stone for graduates as they further their education in advanced health care programs, e.g., practical nurse, registered nurse, radiographic technician, physical or occupational therapy, or other related careers.

## 50.00.00.0 Nurse Assistant

#### 50.01.00.0 Nurse Assistant Orientation

50.01.01.0	Define	role of	f the nurse	assistant

- 50.01.01.01 Outline the scope of the nurse assistant
- 50.01.01.02 Survey the history of the nurse assistant career 50.01.01.03 Identify career opportunities of the nurse assistant

#### 50.01.02.0 Project professional image

- 50.01.02.01 Exhibit professional image, attitude, and manners 50.01.02.02 Demonstrate dependability, loyalty, caring, respect, and honesty 50.01.02.03 Demonstrate initiative and self-confidence
- 50.01.02.04 Identify individual's role to employing organization
- 50.01.02.05 Demonstrate positive relations in the workplace
- 50.01.02.06 Demonstrate teamwork in the workplace
- 50.01.02.07 Recognize diversity in the workplace 50.01.02.08 Maintain confidentiality in handling discretionary issues 50.01.02.09 Participate in staff meetings

### 50.01.03.0 Demonstrate familiarity with clinical facility

- 50.01.03.01 Identify the location of fire exits and escape routes
- 50.01.03.02 Demonstrate the use of fire extinguishers

- 50.01.03.03 Demonstrate use of personal safety apparatus
  50.01.03.04 Identify specialized facility equipment
  50.01.03.05 Access needed information using manufacturer's instructions/manuals
- 50.01.03.06 Describe the physical layout of given clinical facility

### 50.01.04.0 Follow facility policies

- 50.01.04.01 Comply with dress code
- 50.01.04.01 Comply with aress code
  50.01.04.02 Demonstrate grooming habits appropriate to given facility
  50.01.04.03 Comply with facility policy and procedure manual and/or handbooks
  50.01.04.04 Comply with facility expectations for specific job assignments
  50.01.04.05 Identify facility security policies

#### 50.01.05.0 Identify facility evacuation procedures

- 50.01.05.01 Identify actions to take in the event of fire 50.01.05.02 Identify actions to take in the event of natural disaster
- 50.01.05.03 Identify actions to take in emergency situations other than fire or natural disaster

#### 50.01.06.0 Identify the roles and responsibilities of the health care team

- 50.01.06.01 Differentiate between acute care, long-term care, and home care
- 50.01.06.02 Identify the major responsibilities of a nurse assistant
- 50.01.06.03 Identify nursing staff responsibilities
- 50.01.06.03 Identify the roles and responsibilities of the governing body (e.g., the owner, administrator, director of nursing, medical director, and other persons of authority)
  50.01.06.05 Identify the roles and responsibilities of regulatory and survey agencies (e.g., Ohio Department of Health (ODH), Occupational Safety and Health Administration (OSHA), Center for Disease Control (CDC), and Joint Commission on Accrediting Health Care (JCAHO) organizations
- 50.01.06.06 Identify roles and responsibilities of resident client advocates, ombudsman, and client care advocates 50.01.06.07 Identify the roles and responsibilities of health care personnel (e.g., resident/client's private physician, volunteers, social services personnel, physical therapist, occupational therapist, and support staff)

#### 50.01.07.0 Identify state and federal nurse assistant requirements

- 50.01.07.01 Define standard terms and abbreviations associated with the governmental regulation of nurse assistants 50.01.07.02 Describe the purpose and procedures of nurse assistant training

- 50.01.07.03 Describe the purpose and procedures of nurse assistant evaluation
  50.01.07.04 Identify the procedures for being tested and recorded/maintained on the nurse assistant registry
  50.01.07.05 Identify the process for reporting and recording the abuse, mistreatment, and/or neglect of a resident/client by a nurse assistant
- 50.01.07.06 Maintain current status on Nurse Assistant Registry

#### 50.01.08.0 Identify the spiritual and cultural aspects of resident/client care

- 50.01.08.01 Identify the nurse assistant's role in the spiritual aspects of resident/client care
- 50.01.08.02 Identify the role of cultural diversity in resident/client care and its importance to the nurse assistant 50.01.08.03 Identify resources and support persons that can assist resident/client in coping with their feelings

#### 50.01.09.0 Describe the resident/client care-planning process

- 50.01.09.01 Identify the purpose of the resident/client's comprehensive assessment 50.01.09.02 Identify the purpose of the resident/client's care plan

- 50.01.09.03 Identify the purpose of the resident/client's care conference 50.01.09.04 Identify the nurse assistant's role in the care planning process and care conference
- 50.01.09.05 Identify the nurse assistant's role in gathering and documenting for care plan

50.01.10.0	Demonstrate knowledge of health care settings
50.01.10.01	Identify the purposes of different health care settings
50.01.10.02	Differentiate between the skills needed by a nurse assistant for long-term care, for acute care and for home
	care
50.01.10.03	Identify the skills needed to work as a nurse assistant in each health care setting
50 03 00 0	Physiology and Anatomy
30.02.00.0	1 hysiology and Anatomy
50.02.01.0	Demonstrate knowledge of the basic anatomy of body systems
50.02.01.01	Identify the basic anatomy of the integumentary system
50.02.01.02	Identify the basic anatomy of the nervous system
50.02.01.03	Identify the basic anatomy of the senses (i.e., sight, hearing, smell, touch, taste)
50.02.01.04	Identify the basic anatomy of the cardiovascular system
	Identify the basic anatomy of the respiratory system
50.02.01.06	Identify the basic anatomy of the musculoskeletal system
	Identify the basic anatomy of the gastrointestinal system
	Identify the basic anatomy of the urinary system Identify the basic anatomy of the endocrine system
	Identify the basic anatomy of the reproductive system
50.02.01.10	Identify the basic anatomy of the immune system
30.02.01.11	tuently the basic anatomy of the minimal system.
50.02.02.0	Demonstrate knowledge of the basic physiology of body systems
50.02.02.01	Identify the basic physiology of the integumentary system
50.02.02.02	Identify the basic physiology of the nervous system
50.02.02.03	Identify the basic physiology of the senses (i.e., sight, hearing, smell, touch, taste)
50.02.02.04	Identify the basic physiology of the cardiovascular system
50.02.02.05	Identify the basic physiology of the respiratory system
50.02.02.06	Identify the basic physiology of the musculoskeletal system
50.02.02.07	Identify the basic physiology of the gastrointestinal system
50.02.02.08	Identify the basic physiology of the urinary system
50.02.02.09	Identify the basic physiology of the endocrine system
50.02.02.10	Identify the basic physiology of the reproductive system Identify the basic physiology of the immune system
30.02.02.11	identify the basic physiology of the minute system
50.03.00.0	Emergency Care*
	Complete course in first aid
	Complete first-aid training in accordance with American Red Cross standards
	Update first-aid skills through specialized training sessions  Recognize emergency situations (e.g., severe bleeding, seizure, fainting, shock)
	Perform first-aid measures appropriate for a given situation
	Perform the Heimlich maneuver
50.05.01.05	3.51.51.11.11.11.11.11.11.11.11.11.11.11.
50.03.02.0	Complete course in cardio pulmonary resuscitation (CPR)
50.03.02.01	Complete one-person adult CPR training in accordance with American Heart Association or American Red
	Cross standards
50.03.02.02	Maintain CPR certification annually
50.03.03.0	Identify the roles of various personnel in responding to
	emergencies in the health care facility
50.03.03.01	Identify facility policies governing emergencies
50.03.03.02	Identify the location of emergency equipment
50.03.03.03	Identify the personnel with primary responsibility in emergency situations
50.03.03.04	Identify the nurse assistant's role in emergency situations
50.04.00.0	Infection Control and Resident/Client Safe Practices
50.04.01.0	Demonstrate established procedures for dealing with
	environmental safety hazards, accidents, and disasters
50.04.01.01	Identify the environment of the local health care setting
50.04.01.02	Follow the environmental safety rules of given facility
50.04.01.03	Identify fire prevention and control methods, location of fire alarm systems, fire reporting procedures, and
	facility exit routes
50.04.01.04	Follow the established safety precautions for using equipment
50.04.01.05	Follow the established safety precautions for using liquids and poisonous substances Identify resources for poison control and hazard communications
50.04.01.06	I GENUTY RESOURCES for BOISON CONITOL AND DAZARD COMMUNICATIONS
	Condition to the improvious of conident/slient areas
50.04.01.08	Conduct safety inspection of resident/client areas
30.04.01.09	Conduct safety inspection of resident/client areas  Correct identified safety hazards as directed
	Conduct safety inspection of resident/client areas  Correct identified safety hazards as directed  Participate in completing written incident reports for accidents or safety infractions
50.04.01.10	Conduct safety inspection of resident/client areas Correct identified safety hazards as directed Participate in completing written incident reports for accidents or safety infractions Identify the legal implications of accidents in the health care facility
50.04.01.11	Conduct safety inspection of resident/client areas Correct identified safety hazards as directed Participate in completing written incident reports for accidents or safety infractions Identify the legal implications of accidents in the health care facility Identify reasons that a resident/client may be more susceptible to accidents Employ precautions designed to prevent resident/client from falling
50.04.01.11 50.04.01.12 50.04.01.13	Conduct safety inspection of resident/client areas  Correct identified safety hazards as directed  Participate in completing written incident reports for accidents or safety infractions  Identify the legal implications of accidents in the health care facility  Identify reasons that a resident/client may be more susceptible to accidents  Employ precautions designed to prevent resident/client from falling  Employ techniques designed to prevent resident/client from being burned by hot liquids or lit cigarettes
50.04.01.11 50.04.01.12 50.04.01.13 50.04.01.14	Conduct safety inspection of resident/client areas Correct identified safety hazards as directed Participate in completing written incident reports for accidents or safety infractions Identify the legal implications of accidents in the health care facility Identify reasons that a resident/client may be more susceptible to accidents Employ precautions designed to prevent resident/client from falling Employ techniques designed to prevent resident/client from being burned by hot liquids or lit cigarettes Employ techniques designed to prevent resident/client from choking or ingesting harmful substances
50.04.01.11 50.04.01.12 50.04.01.13 50.04.01.14 50.04.01.15	Conduct safety inspection of resident/client areas Correct identified safety hazards as directed Participate in completing written incident reports for accidents or safety infractions Identify the legal implications of accidents in the health care facility Identify reasons that a resident/client may be more susceptible to accidents Employ precautions designed to prevent resident/client from falling Employ techniques designed to prevent resident/client from being burned by hot liquids or lit cigarettes Employ techniques designed to prevent resident/client from choking or ingesting harmful substances Follow established procedures for situations in which a resident/client chokes or ingests a harmful substance

= 0 < 0 = 0	
50.06.03.0	Manage resident/client data
50.06.03.01	Identify reasons why resident/client observation is important Identify the purpose of medical records
50.06.03.03	Identify the purpose of inedical records  Identify approved methods of documentation
50.06.03.04	Use all senses in head-to-toe observations
50.06.03.05	Distinguish between subjective and objective observations
50.06.03.06	Identify observations that must be reported immediately Identify the legal aspects of medical records
50.06.03.08	Follow established procedures in correcting chart errors
50.06.03.09	Record documentation on specified forms
50.06.03.10	Use color coding in accordance with facility policy for ink charting
50.06.04.0	Inventory resident/client's personal property
50.06.04.01	Identify ways to ensure the security of resident/client's possessions
50.06.04.02	Identify facility policies and procedures regarding the inventorying and storage of resident/client's
50.06.04.03	possessions Identify facility policies and procedures regarding the retrieval of resident/client's possessions
	Assist resident/client with reporting missing personal property
	1. 0 0. 1.1
50.07.00.0	Basic Personal Care
50 07 01 0	Interact with resident/client
	Explain importance and rationale of procedure to be performed
	Identify the characteristics of different stages of growth and development
50.07.01.03	Identify attitudes and behaviors that promote interaction between the nurse assistant and resident/client
	Maximize positive interaction with resident/client during personal care procedures
	Provide opportunities for resident/client to express their thoughts and feelings Acquaint resident/client with their physical environment
	Assist resident/client in adjusting to changes of environment
50 07 02 0	Make a bed
	Make a closed bed
	Make an open bed
50.07.02.03	Make an occupied bed
	Make a postoperative bed
	Make a traction bed Apply principles of body mechanics when making a bed
	Ensure resident/client safety, comfort, and dignity when making a bed
	Adjust bed height
50.07.03.0	Provide or assist with resident/client bath
50.07.03.01	Identify the purpose of bathing resident/client
50.07.03.02	Interpret bath thermometer reading
50.07.03.03	Give partial and complete a bed bath Give a shower bath
	Give a tub bath
	Give a whirlpool bath
	Identify the importance of resident/client positioning and draping
	Ensure resident/client privacy and comfort Report unusual conditions observed during bathing
50.07.03.10	Identify ways to promote resident/client independence in the bathing process
50.07 04 0	Provide skin care
	Maintain skin integrity
	Identify at-risk resident/client
	Implement measures to prevent skin breakdown as directed
50.07.04.04	Report changes in skin condition Provide special skin care as directed
	-
	Give a back rub
50.07.05.01	Identify the purposes of a back rub
50.07.05.02	Identify the conditions under which use of a back rub is indicated Identify the purpose of using lotion in giving a back rub
50.07.05.04	Apply principles of body mechanics for nurse assistant and resident/client when giving back rub
50.07.05.05	Employ accepted technique for giving a back rub to resident/client
50.07.06.0	Provide perineal care
50.07.06.01	Identify the anatomy and physiology of the perineum
50.07.06.02	Identify the purpose of perineal care
50.07.06.03	Select the supplies and equipment needed Observe and report unusual conditions of the perineum
50.07.06.05	Identify the feelings of the resident/client and nurse assistant related to perineal care
50.07.06.06	Employ accepted technique for providing perineal care to female and male resident/client

50.07.07.0	Assist with toileting
50.07.07.01	Assist resident/client in using a bedpan, fracture pan, and urinal
50.07.07.02	Assist resident/client in using a toilet and bedside commode
50.07.07.03	Provide resident/client with necessary toileting supplies
50.07.07.04	Assist with hygiene care as requested
50 07 08 0	Administer oral hygiene and denture care
50.07.08.01	Identify the goals of oral hygiene Identify when oral hygiene is indicated
	Identify when of an hygiene is indicated  Identify the relationship of oral hygiene to optimal health
50.07.08.03	Identify methods of encrustation removal
50.07.08.04	Identify the conditions to look for in the oral cavity when administering oral hygiene
50.07.08.05	Identify differences in administering oral hygiene for a conscious and an unconscious resident/client
50.07.08.00	Clean teeth and gums using a toothbrush, swabs, and emollient
50.07.08.08	Identify types of dentures
	Clean dentures
50.07.00.0	December for all ages
	Provide foot care
	Identify significant observations
	Collect needed supplies and equipment
50.07.09.03	Select safe water temperature range
	Wash resident/client's feet as directed
	Dry feet thoroughly
	Provide comfort measures as indicated Document and/or report observations
	1
50.07.10.0	Provide hair care
	Explain to a resident/client the importance of routine hair care
	Ensure maximum resident/client independence, preference, and dignity
50.07.10.03	Identify differences in hair care according to hair texture
	Identify signs and symptoms of scalp disease
	Select appropriate hair care products
	Shampoo ambulatory resident/client
	Shampoo nonambulatory resident/client
	Brush resident/client's hair
50.07.10.09	Comb resident/client's hair
50 07 11 0	Provide nail care
	Identify terms and gross anatomy related to nail care
	Identify uses of nail care implements
	Identify safety and hygiene concerns involved in daily nail care
50.07.11.03	Obtain permission from the head nurse before trimming or cutting nails
50.07.11.05	Trim resident/client's fingernails
	File resident/client's fingernails
50.05.10.0	n - 11 & 131 -1
	Provide facial hair care
50.07.12.01	Secure permission from designated individual prior to shaving a resident/client
	Ensure maximum resident/client independence
50.07.12.03	Identify needed supplies
50.07.12.04	Identify the purposes and uses of preshave and after-shave lotions Shave resident/client using an electric or safety razor according to resident/client's preference
50.07.12.05	Identify steps to take in case of a nick or cut
50.07.12.00	Trim facial hair
30.07.12.07	Thin idelal lian
50.07.13.0	Change or help resident/client change clothing
50.07.13.01	Ensure maximum resident/client independence in clothing selection, dressing, and undressing
50.07.13.02	Apply established principles in assisting or dressing resident/client
50.07.13.03	Change clothing of resident/client with intravenous (IV) or other tubing
50 07 13 04	Use devices that assist resident/client in dressing
50.07.13.05	Change clothing of resident/client afflicted with decrease in physical mobility or decreased range of
50.07 14 0	Turn and position a resident/client
	Identify the reasons for turning and positioning a resident/client in bed
	Comply with the turning schedule
50.07.14.02	Apply principles of body mechanics for nurse assistant and resident/client when turning and positioning a
50.07.14.05	resident/client
50.07.14.04	Turn and position a resident/client in proper alignment
50.07.14.05	Reposition a resident/client (e.g., in wheelchairs, gerichairs)
50.07.14.06	Provide comfort measures
50.07.14.07	Use various assistive devices to facilitate the turning/positioning process

50 07 15 0	Provide resident/client nutrition and hydration
50 07 15 01	Identify the importance of adequate nutrition and hydration
	Identify nutrients and food groups
50.07.15.03	Identify the signs and symptoms of dehydration
50.07.15.04	Identify fortage that offert the autility of state of acident/client
	Identify factors that affect the nutritional state of resident/client
50.07.15.05	Identify examples of modified and therapeutic diets
	Identify regional, cultural, and religious food preferences
30.07.13.06	identity regional, cultural, and religious food preferences
50.07.15.07	Identify special fluid orders (force fluids, restricted fluids, thickened fluids, and NPO)
50.07.15.09	Hartiff ways to an assurance adaptive fluid inteles
30.07.13.06	Identify ways to encourage adequate fluid intake
50.07.15.09	Promote a positive mealtime atmosphere
50 07 15 10	Identify devices and techniques that promote resident/client independence
30.07.13.10	identity devices and techniques that promote resident/effect independence
50.07.15.11	Employ accepted methods for feeding resident/client
	Participate in the feeding process as requested
50.07.15.13	Identify ways to prevent choking
50 07 15 14	Report changes in eating habits
50.07.15.14	the control of the co
50.07.15.15	Identify nurse assistant's responsibilities for resident/client on therapeutic diet
50 07 15 16	Identify the nurse assistant's role in tube feeding
30.07.13.17	Identify alternative methods for food intake
50 07 16 0	Tunnefor a maidentalism
20.07.10.0	Transfer a resident/client
50 07 16 01	Ensure maximum resident/client safety and independence during transfer
50.07.16.02	Apply principles of body mechanics and alignment for nurse assistant and resident/client during transfer
	Identify situations that warrant the use of particular lifts
	Transfer resident/client from a bed to a wheelchair or vice versa
	Transfer resident/client to and from a wheelchair or geriatric chair
50.07.10.03	The set of the state of the sta
50.07.16.06	Transfer resident/client to and from a vehicle
50.07.16.07	Transfer resident/client from a cart/stretcher to a bed using a transfer board
50.07.10.07	The of the state o
	Transfer resident/client using a portable mechanical lift
50 07 16 09	Transfer resident/client using two-person and three-person lifts
30.07.16.10	Observe resident/client condition prior to, during, and after transfer
50 07 17 O	Assist with ambulation
20.07.17.0	Assist with ampulation
50 07 17 01	Identify situations in which resident/client may need assistance in ambulating
	Ensure maximum independence and safety for resident/client who needs help in ambulating
50 07 17 03	Identify standard assistive devices and adaptive equipment and their uses
50.07.17.04	Assist resident/client in using assistive devices and adaptive equipment
50 07 17 05	Help resident/client move from a sitting or supine position to a standing position
50.07.17.05	A
30.07.17.06	Assist resident/client in ambulating with a cane, walker, or crutches
50.07.17.07	Help resident/client with balance in sitting, walking, and standing
30.07.17.08	Identify signs of distress related to ambulation
	Identify signs of distress related to ambulation  Contribute to the development and implementation of ambulation development care
50.07.17.09	Contribute to the development and implementation of ambulation development care
50.07.17.09	Contribute to the development and implementation of ambulation development care
50.07.17.09	
50.07.17.09 <b>50.08.00.0</b>	Contribute to the development and implementation of ambulation development care  Vital Signs

50 08 05 0	Measure/record height and weight
	Identify the medical implications of height and weight
50.08.05.01	Identify procedures for ensuring accurate weight measurement
	Measure resident/client's weight using appropriate type of scale
	Read whole numbers and fractions on scale
	Report abnormal weight loss or gain
	Measure height of an ambulatory and/or bedfast resident/client
50.08.05.07	Chart height and weight measurements on specified forms
50.09.00.0	Nurse-Related Procedures
50.09.01.0	Assist with admissions, transfers, and discharges
	Display sensitivity to resident/client feelings during admission, transfer, and/or discharge
	Assist resident/client during admission in accordance with facility policy
	Assist with assessment procedures as directed by nurse
	Assist resident/client during transfer in accordance with facility policy Assist resident/client during discharge in accordance with facility policy
30.07.01.03	Assist lesidelivenent during discinarge in decordance with identity poncy
50.09.02.0	Document activities of daily living (ADL)
	Identify major categories of activity in ADL
	Identify the purpose of promoting resident/client independence in ADL
	Identify strategies for encouraging maximum resident/client independence in ADL
	Observe ADL Record ADL in accordance with facility policy
	Report ADL in accordance with facility policy
	Document resident/client orientation to person, place, and time
	Ask questions to elicit resident/client's orientation to person, place, and time
	Identify circumstances that can cause changes in orientation
	Report changes in resident/client's orientation to person, place, or time Identify ways to help reorient resident/client to person, place, and time if appropriate
30.07.03.04	racing ways to help technic testacherion to person, place, and time it appropriate
50.09.04.0	Measure intake and output (I & O)
	Identify the reasons for monitoring and recording intake and output
50.09.04.02	Identify foods considered to be liquid
50.09.04.03	Identify different forms of output Identify the tools used for measuring intake and output
50.09.04.04	Measure fluids using the metric system
	Calculate intake and output
50.09.04.07	Complete specified intake and output sheet
50.09.04.08	Report abnormal findings
50.09.05.0	Apply cold or warm compresses
50.09.05.01	Identify situations when a cold or warm compress may be ordered
50.09.05.02	Identify types of cold and warm compresses
	Follow established procedure in applying a cold or warm compress
50.09.05.04	Report observations concerning effects of cold and warm compresses
	Assist resident/client with a sitz bath
	Identify types of sitz baths
	Identify the effective temperature range for the water in a sitz bath
	Check water temperature using a bath thermometer Check water temperature without a thermometer
	Assist resident/client into and out of a sitz bath
	Report observations concerning effects of sitz bath
50 09 07 0	Provide decubitus prevention and care
50.09.07.01	Identify terms and abbreviations associated with decubiti
50.09.07.02	Identify causes of decubiti
50.09.07.03	Identify symptoms of potential decubitus formation
50.09.07.04	Implement measures to help prevent decubiti
50.09.07.05	Identify places on body to check for a decubitus
50.09.07.06	Report objective signs of healing or worsening of a decubitus  Identify the legal implications of failure to follow the care plan
50.09.08.0	Apply antiembolism hose
50.09.08.01	Identify causes of embolism
	Identify types and sizes of antiembolism hose Identify the purpose of antiembolism hose
50.09.08.03	Identify the side effects associated with the improper use of antiembolism hose on a resident/client
50.09.08.05	Demonstrate proper application of antiembolism hose

	Assist with braces or prostheses Identify different types of braces and prosthetic devices and the purposes of each (e.g., those used for
	ambulation, cosmetic purposes, auditory or vision enhancement)  Identify skin care issues related to the use of a brace or artificial limb  Acknowledge the expertise and preferences of the resident/client regarding his/her brace or prosthesis
	Apply braces or prosthetic devices as ordered
	Clean braces and prosthetic devices
50.09.09.06	Store braces and prosthetic devices Ensure proper identification of braces and prosthetic devices
	Assist in preparing a resident/client for surgery* Identify common psychological reactions to surgery
50.09.10.02	Offer support to surgical resident/client's family members
50.09.10.03	Reinforce pre-operative teaching Identify actions that should be taken before surgery
50.09.10.05	Prepare resident/client for surgery as directed
<b>50.09.11.0</b>	Assist a resident/client with postoperative care* Prepare unit to receive patient from surgery*
50.09.11.02	Identify what should be done for a resident/client returning from surgery
50.09.11.03	Identify potential complications of surgery Identify the steps in the healing process and factors that support healing
50.09.11.05	Use all senses in observing the postoperative resident/client  Identify symptoms that should be reported immediately
50.09.11.06	Identify symptoms that should be reported immediately
	Assist with coughing and deep-breathing exercises Assist with turning a resident/client as directed
50.09.11.09	Demonstrate sensitivity around post-operative patients (e.g., use careful conversation)
	Report actions taken and observations made
	Collect sputum specimen* Describe sputum characteristics
50.09.12.02	Distinguish between sputum and saliva
	Prepare a resident/client for sputum collection Follow established procedures in collecting and disposing of sputum
	Collect urine for testing
	Identify the reasons for routine urinalysis
50.09.13.02	Identify the reasons for urine collection
50.09.13.03	Identify the purpose of obtaining clean-catch urine specimen Identify instructions for male and female resident/clients when a clean-catch urine specimen is required
50.09.13.05	Instruct a resident/client on the procedure for collecting urine specimen
	Assist a resident/client as requested Complete collection and disposition procedures
	Provide care for incontinent resident/client (bowel and bladder)
50.09.14.01	Identify causes of incontinence
50.09.14.02	Follow the care plan for incontinent resident/client Identify the psychological, physical, and social effects of incontinence
	Provide skin care and perineal care for incontinent resident/client
50.09.15.0	Identify care and prevention procedures for a constipated resident/client with
50.09.15.01	impaired bowel function Identify the characteristics of normal and abnormal bowel elimination
50.09.15.02	ldentify signs that may indicate a resident/client is constipated
	Implement measures to prevent impaction and/or alleviate constipation as directed Observe/report/record bowel functions
	Assist with urinary catheter care
50.09.16.01	Identify how a urinary catheter works
50.09.16.02	Differentiate between various types of urinary catheters
50.09.16.03	Identify measures for avoiding injuring the bladder opening with the catheter Position the catheter, tubing, and collection bag
50.09.16.05	Maintain a closed system Apply external catheter
50.09.16.06 50.09.16.07	Apply external catheter Empty/measure contents of drainage bag
50.09.17.0	Collect a stool specimen
50.09.17.01	Collect necessary supplies
	Identify the characteristics of a normal stool Follow established procedures in collecting and disposing of a stool specimen
	Report results and/or observations
	Give an enema*
50.09.18.01	Describe the physical conditions necessary for the administration of an enema
50.09.18.02	Collect necessary supplies Perform enema procedure as directed
	Report results and observations

50.09.19.0	Assist with oxygen administration
50.09.19.01	Identify key terms and abbreviations associated with oxygen therapy
50.09.19.02	Identify conditions that may require oxygen administration Identify ways of administering oxygen
50.09.19.04	Follow safety precautions for oxygen use
	Provide personal care for resident/client receiving oxygen Report abnormal signs associated with oxygen administration
50.09.20.0	Provide personal care for resident/client receiving intravenous
50.09.20.01	Identify the purpose of IV therapy
	Observe/report adverse reactions to the IV therapy Provide care for the IV when moving or transferring resident/client
	Change resident/client's clothing with the IV in place
50.10.00.0	Death and dying
	Assist with a dying resident/client
	Identify resident/client status as code or no code
	Identify the five stages of dying and death
	Employ accepted strategies for meeting the emotional needs of a dying resident/client Employ accepted strategies for meeting the physical needs of a dying resident/client
50.10.01.05	Employ accepted strategies for meeting the social needs of a dying resident/client
	Describe the physical signs of imminent death Identify religious and cultural rites associated with dying and their significance to resident/client and the
50.10.01.08	families  Identify ways to involve the dying resident/client's human support system in providing resident/client care
	Identify the possible responses of others (e.g., other residential resident/client, staff, family) to the death of a residential resident/client
50 10 02 0	Assist with postmortem care
50.10.02.01	Identify religious and cultural rites and facility policies associated with postmortem care
50.10.02.02	Demonstrate respect and gentleness in caring for the deceased
30.10.02.03	Comply with established procedures for the discreet removal of the deceased
50.11.00.0	Care of Elderly Resident/Client
50.11.01.0	Demonstrate knowledge of the aging process and its effects
<b>50.11.01.0</b> 50.11.01.01	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development
<b>50.11.01.0</b> 50.11.01.01 50.11.01.02	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care
<b>50.11.01.0</b> 50.11.01.01 50.11.01.02 50.11.01.03	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care Identify the skills necessary to support appropriate behavior and allow resident/client to make personal choices and maintain their dignity
<b>50.11.01.0</b> 50.11.01.01 50.11.01.02 50.11.01.03	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care Identify the skills necessary to support appropriate behavior and allow resident/client to make personal
50.11.01.0 50.11.01.01 50.11.01.02 50.11.01.03 50.11.01.04 50.11.01.05	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care Identify the skills necessary to support appropriate behavior and allow resident/client to make personal choices and maintain their dignity Identify the principles of behavior management (e.g., reinforce appropriate behavior, implement strategies to reduce or eliminate inappropriate behavior) Identify age-related physical changes in each body system
50.11.01.0 50.11.01.01 50.11.01.02 50.11.01.03 50.11.01.04 50.11.01.05 50.11.01.06	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care Identify the skills necessary to support appropriate behavior and allow resident/client to make personal choices and maintain their dignity Identify the principles of behavior management (e.g., reinforce appropriate behavior, implement strategies to reduce or eliminate inappropriate behavior) Identify age-related physical changes in each body system Identify mental changes related to aging
50.11.01.0 50.11.01.01 50.11.01.02 50.11.01.03 50.11.01.04 50.11.01.05 50.11.01.06 50.11.01.07	Demonstrate knowledge of the aging process and its effects Identify influences of aging on personality development Identify ways to help elderly resident/client accomplish developmental tasks by encouraging independence and optimal self-care Identify the skills necessary to support appropriate behavior and allow resident/client to make personal choices and maintain their dignity Identify the principles of behavior management (e.g., reinforce appropriate behavior, implement strategies to reduce or eliminate inappropriate behavior) Identify age-related physical changes in each body system Identify mental changes related to aging Identify social and sexual changes related to aging Identify appropriate nurse assistant responses to sexuality issues, including the handling of perceived sexual

50.11.03.0	Identify illnesses, physical disorders, and diseases common to the
	Recognize the signs and symptoms of common diseases and conditions
50.11.03.02	Identify common illnesses, physical disorders, and diseases of the elderly (e.g., CVA, COPD, CHF, arthritis,
50.11.03.03	diabetes. osteoporosis) Identify safety concerns associated with identified illnesses and physical disorders
	Describe the psychosocial impact of identified diseases and conditions on the resident/client, the
	resident/client's family and friends, and the health care team
	Identify support strategies and resources associated with identified conditions and diseases
50.11.03.06	Contribute to the assessment, planning, and evaluation of nursing care for elderly resident/client with a disease or disorder
50.11.03.07	Recognize abnormal signs and symptoms of common diseases and conditions of elderly
	Follow established procedures for reporting abnormal signs and symptoms of common diseases and
	conditions in the elderly
50.11.04.0	Contribute to the assessment, planning, and evaluation of nursing care for an
2011110110	elderly resident/client with mental disorders
50 11 04 01	Identify the most common mental illnesses of elderly resident/clients (e.g., depression, bipolar disorder,
30.11.04.01	schizophrenia)
50.11.04.02	Identify the etiology, treatment modes, and nursing care associated with common mental illness or mental
60 11 04 02	retardation
	Identify the safety needs of elderly resident/client with mental disorder  Assist in planning safe environment for mentally ill/mentally retarded resident/client and associated staff and
30.11.01.01	family
	Recognize common signs of suicidal behavior
	Report observed changes in behavior or increased incidence of abnormal behavior
	Identify appropriate responses to the behavior of mentally ill or mentally retarded resident/client Apply principles of behavior management
	Identify ways to handle the bumout and stress related to caring for mentally ill or mentally retarded
	resident/client
50.11.04.10	Identify community support groups for families of mentally ill or mentally retarded resident/client
50.11.05.0	Provide care for an Alzheimer's and related dementia
	Identify the causes, symptoms, and psychosocial implications of resident/client confusion or withdrawal
50.11.05.02	Apply accepted individualized interventions as directed
50.11.05.03	Describe the disease process and stages of Alzheimer's disease
50.11.05.04	Identify positive ways to modify own behavior in response to resident/client behavior Report changes in resident/client's physical and mental status
	Distinguish between dementia, delirium, and depression
	Identify behaviors of Alzheimer's/dementia resident and how to accommodate
50.11.05.08	Describe ways to accommodate an Alzheimer's/dementia resident
	Identify effective methods of communicating with an Alzheimer's/dementia resident/client
50.11.05.10	Identify methods to manage combative and wandering behaviors in Alzheimer's/dementia resident/client
50.11.06.0	Assist a resident/client in relaxing and sleeping
	Identify factors that influence a resident/client's sleep
	Identify action nurse assistant can take to help a resident/client sleep
	Support a resident/client preferences and sleep/wake habits Identify relaxation techniques
30.11.00.04	identity relaxation definiques
50 12 00 0	Care of Resident/Client with Special Needs
	•
50.12.01.0	Identify special conditions (e.g., multiple sclerosis, cerebral palsy, traumatic
** ** **	injuries, developmental disabilities, ventilator dependent resident/client)
50.12.01.01	Demonstrate resident's level of participation in restorative activity  Describe the psychosocial impact of identified diseases and conditions on the resident/client, the
30.12.01.02	resident/client's family and friends, and the health care team
50.12.01.03	Identify community support groups
	Identify support strategies and resources

# **50**

# 50

50.12.01.05 Identify safety concerns for a special needs resident

# 50.12.02.0 Demonstrate knowledge of needs of special resident (e.g., adaptive equipment and methods 50.12.02.01 Identify adaptive tools (e.g., food utensils, mobility devices, communication devices) 50.12.02.02 Identify safety devices (e.g., helmets, padded rails, mats, lap buddies)

## 50.13.00.0 Restorative Duties 50 13 01 0 Demonstrate knowledge of restorative care besics

,U.13.U1.U	Demonstrate knowledge of restorative care basies
50.13.01.01	Explain the importance of cooperation among members of the health care team to training success
EO 12 O1 O2	Define and adding and

50.13.01.02 Define restorative care 50.13.01.03 Identify the requirements of restorative care

50.13.01.04 Identify approaches to restoring resident/client's independence

50.13.01.05 Define terminology for restorative care
50.13.01.06 Identify outcomes of restorative care
50.13.01.07 Identify documentation requirements for restorative care

50.13.01.08 Identify equipment used in restorative care (e.g., splints, braces, adaptive equipment)

## 50.13.02.0 Implement bladder and bowel training

50.13.02.01 Identify the purpose of bowel and bladder training

50.13.02.02 Identify the importance of patience, empathy, and positive reinforcement to the success of bladder and bowel training

50.13.02.03 Document/report outcomes and results

#### 50.13.03.0 Provide range-of-motion exercises

50.13.03.01 Identify the principles and rules governing range-of-motion exercises 50.13.03.02 Identify different types of range of motion exercises

50.13.03.03 Identify types of resident/client who requires range-of-motion exercises

50.13.03.04 Apply the principles of body mechanics in performing range-of-motion exercises

50.13.03.05 Observe resident/client during range-of-motion exercises 50.13.03.06 Report/document observations and outcomes

50.13.03.07 Implement measures that help prevent complications of immobility as directed

#### 50.13.04.0 Assist in implementing behavior management/reinforcement plans

50.13.04.01 Identify terms associated with behavior management/reinforcement theory

50.13.04.02 Identify appropriate responses to abnormal behavior

50.13.04.03 Manage/reinforce behavior in accordance with the established plan

50.13.04.04 Identify ethical concerns related to use of behavior management/reinforcement techniques

#### 50.13.05.0 Assist in implementing communication development and reinforcement plans

50.13.05.01 Identify terms associated with alterations in resident/client's ability to communicate

50.13.05.02 Develop/reinforce communication in accordance with the established plan

50.13.05.03 Use devices designed to enhance communication skills

50.13.05.04 Identify appropriate responses to resident/client's attempts to communicate

50.13.05.05 Identify ethical concerns regarding communication and confidentiality

#### 50.13.06.0 Provide assistance and/or training in the activities of daily living

50.13.06.01 Demonstrate appropriate assistive devices in ADL

50.13.06.02 Assist in implementing the care plan to improve or restore ADL

50.13.06.03 Identify training needs

50.13.06.04 Document observations and outcomes

50.13.06.05 Describe utilization of restorative devices/equipment and assistive equipment 50.13.06.06 Identify physical measures used in restorative care

50.13.06.07 Identify mechanical devices used in restorative care

#### 50.14.00.0 Home Health Care

#### 50.14.01.0 Demonstrate knowledge of the requirements for the provision of home health care

50.14.01.01 Differentiate between the roles and responsibilities of various direct care providers

50.14.01.02 Identify the procedure for becoming a state-approved home health assistant 50.14.01.03 Identify the responsibilities of a home health assistant in relation to the resident/client and supervisor (i.e.,

care is provided per directives of supervisor)
50.14.01.04 Identify the legal and ethical concerns of being a home health care provider

#### 50.14.02.0 Provide for the special needs of a resident/client in home setting

50.14.02.01 Assist resident/client in using special safety devices

50.14.02.02 Provide a safe environment

50.14.02.03 Interact with resident/client and his/her families

50.14.02.04 Maintain records

50.14.02.05 Report to designated health professional

#### 50.14.03.0 Perform homemaking tasks

50.14.03.01 Perform light housekeeping and laundry tasks

50.14.03.02 Provide assistance with meal preparation 50.14.03.03 Assist with household record keeping

50.14.03.04 Assist with infant and childcare

## 50.14.04.0 Perform special procedures

50.14.04.01 Adapt prior knowledge of basic resident/client care to home setting 50.14.04.02 Assist a resident/client with self-administration of over-the-counter and prescription medications

50.14.04.03 Assist with procedures as instructed by health-care team

50.14.04.04 Document observations and activities
